

Remove Underlying Obstacles

Infection Bioburden

- Abscesses/Cysts due to bacteria
- Osteomyelitis (Can tunnel up to the surface)
- Improper wound care & poor dressing could damage surrounding skin
- Diabetics with High blood sugars inhibits white blood cells

Edema & Poor Circulation

- CHF/ COPD
- Arterial Insufficiency caused by PASD (Peripheral Atherosclerosis disease)
- Venous Insufficiency caused by pooling of blood and fluids

Repetitive Trauma

- Magnified in spinal cord patients or paraplegics
- Diabetic patients with no feelings
- Continuous bumping/rubbing against surfaces
- Lack of turning/positioning

Nutrition is the Building Blocks for Wound Healing

HYDROLYZED COLLAGEN & WHEY

30x collagen production

DIPEPTIDES PO & OG

ZINC & COPPER

L-CITRULLINE
L-ARGININE

VITAMIN C, E & B12

L-GLUTAMINE
